

MISSION STATEMENT

Thank you for considering Madhu Khemani for your Real Estate needs. As I ask you for the opportunity to handle the sale of your home, I share this Mission Statement with you because I have a strong belief in my chosen career. I am PROUD to be a Real Estate Professional because I am the best at what I do.

Honesty

I will never deviate from the absolute Truth regardless of the situation or how unwelcome the truth may be to a client. It is your responsibility to make important decisions, and it is my responsibility to make sure you have the facts needed to make the best decisions for you and your family.

Success

The bottom line is that you need to sell your home. I define success as selling home for the absolute top dollar in the least amount of time with the least amount of inconvenience to you. I want to see you on your way to your next destination because of our work. The bottom line is.... I get the job done.

Aggressive Marketing

I am committed to going out into the field every day and LOOKING for as opposed to sitting in the office and WAITING for buyers to call or stop in.

Customers for Life

It is my goal to retain the business of customers for life. Through the success of my customers' experience and the personal service that I provide, my goal is to earn repeat business and referral business from my existing clients.

Communication

The biggest complaint in our business is that sellers never heard from their agent again after listing their property. I call every customer at least two times per week and communicate all relevant information about their home and the market. I promise you will never say "We never heard from our agent."

Business, not hobby

Real Estate is my business, unlike many agents for whom real estate is a hobby or a secondary source of income. I have professional staff and a detailed business plan which enables me to give you the service that you deserve and **sell more homes.**

I am proud to share my mission with you and look forward to earning your business.
